## Human Health and Environment

### Sensitive Products with a Fully

## Automatic Paper Cup Production Facility

## Quality and Food Safety Policy

The most basic principle in our management policies: To produce the most effective, efficient and innovative solutions in line with the demands of our customers in accordance with international hygiene and sterilization criteria, to achieve a high level of Customer Satisfaction and a high level of Total Quality standard at every stage of the production process.

By closely following the current developments in every field of production, we meet the needs of our customers with the latest technologies; It is the most important component of our quality and food safety policy to provide a high level of trust without compromising on adhering to the principles of quality, hygiene, trust and sustainability.

## Sustainability

Euro-Contractor is a company that creates value for people and the environment. This value benefits our business partners, consumers, employees, shareholders, and finally societies and the environment.

## Our Social Responsibility

We believe that social responsibility principles are the most important and valuable part of social and corporate development. Being aware of the responsibility of being a part of the society we are in, we prepare our management, environment and responsibility policies according to innovative approaches.
